Projects

YouTube Home Page Clone using React & Tailwind CSS

Git Hub Link:- <https://github.com/Dikshya-Yug/Youtube-homepage> This project is a front-end clone of the YouTube home page, built using React and styled with Tailwind CSS. The goal of this project is to recreate the core UI elements of the YouTube home screen to understand how modern video platforms structure and style their layouts. The design focuses on responsiveness, modular component structure, and user interface best practices.

Key Features:

- Responsive Navigation Bar with YouTube logo, search bar, and user icons
- Sidebar Menu with categories like

Home, Shorts, Subscriptions, and Library
Video Grid Layout displaying video thumbnails, titles, channel names, and view count
Reusable Components for video cards, buttons, icons, etc.
Dark Mode Compatible design with Tailwind's utility-first classes
Fully Responsive for desktop, tablet, and mobile screens
Tech Stack: React.js – For building the component-based structure
Tailwind CSS – For utility-first, responsive styling
React Icons – For using modern iconography
Purpose & Learning Outcomes: Practice building complex UI layouts using React
Gain hands-on experience with Tailwind CSS for fast and flexible styling
Understand how to create reusable components
Learn how to organize and manage a front-end project structure
